

# Guardian – Beer Line Protector

To protect your beer lines when not in use, we recommend the use of Guardian Beer Line Protector.

This is available to order with your beer delivery or directly from Proton directly.

Order on the Proton Website > [Click Here](#)

Clean your  
lines & cellar  
as normal

Use Guardian  
(follow the  
instructions on  
the container)

Pull Guardian  
through the  
beer lines

Leave  
Guardian in  
the beer  
lines and  
refresh as  
per the  
instructions

To return to  
beer, clean  
the lines  
and cellar  
as normal

Flush with  
clean water  
and put the  
beer back  
on

## How to use Guardian... its easy peasy!

Add the required amount of Guardian Powder (as per dosage guide below) to your cleaning vessel or metal bucket.

Fill the cleaning vessel with clean water and the Guardian powder will dissolve.

Introduce the Guardian solution into your dispense lines in the same way you would when cleaning.

Leave the lines full of Guardian until they are needed again.

To reactivate lines ready for service, simply flush the Guardian solution from the lines with clean water or with beer

A new application of Guardian solution will need to be pulled through at 6 months if dormant for longer than this period.

### Dosage Guide

Length of Shutdown	50L vessel	30L Vessel	10L Vessel
1-4 weeks	500 grms (5 scoops)	300grms (3 scoops)	100grms (1 scoop)
